# DIRECTOR'S NOTE

## Total Income = Expenditure + Savings + Investments

**SANDEEP SURANA**

(MBA in Finance, Gold Medalist)  
With over a decade long experience  
in Financial Markets

As we all know that a person's earning is always allocated in 3 areas, we at **Chandrakala Broking Services** standing here with you for dealing in one of the most prominent subject out of the mentioned 3 chunks i.e. Investments.

Investment is just a word imbibing the power of developing a complete personality of a person. Investing is an art and science and to learn this art and science we need to build some basic characteristics in our thought process. Investing requires a logical framework to connect dots of information to make a sensible decision. These dots of information in itself are complete subject to learn viz Fundamental Analysis, Technical Analysis, Macro Micro economic analysis and much more.

We as an entrepreneur started this journey of building platform for logical investment in 2003 and we feel blessed with today's stand of **Chandrakala Broking Services** serving investors as a main member of BSE, NSE and CDSL. In this journey of more than two decades we have learnt that money is so easy to make in financial markets but the process of making money is so tough to actualize in our lifestyle. The characteristics of being patient and having belief with money invested are the prominent role playing factors to create wealth.

We as a broker have always guided investors to be calm, thoughtful and logical in times of turbulence and volatility in market finding opportunities and buying balanced bunch of stock at reasonable valuation and exiting the same at right time which is the most important perspective to focus upon.

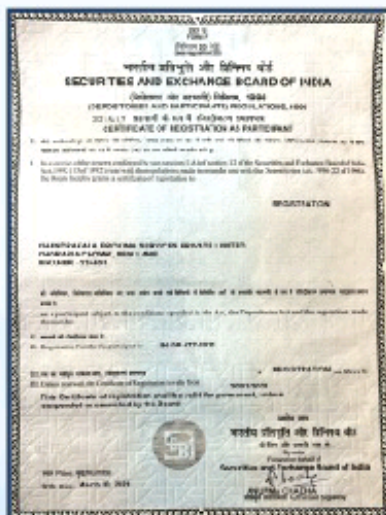

Returns cannot be timed according to your requirements as the markets are inevitably connected to systematic and unsystematic risks which can erode the returns at any point of time and thus there is a requirement of concept of investible trading which helps to give effect of compounding plus real returns to your yields.

It is prudent to understand that markets are prone to risks but it is also advisable to know that markets are there to deliver returns also so here we are urging people of India not to defer this market due to risk parameters but try to enter this market finding the learning way for making portfolios to slide toward returns arena.

Let us join together for ensuring healthy wealth creation out of your hard earned money being invested through our physically equipped systems and processes making a hassle free experience for you.
